Executive Summary of In-depth research Report on Artificial Intelligence (AI) is now available to non-members.

Artificial Intelligence (AI) is currently a widely-discussed topic; it is perceived as a disruptive family of technologies with potential impacts on several aspects of society including electric power companies.

An in-depth research on AI technology as a part of Technology Foresight project has been issued to IERE members on March 5th, 2019. This report aims to provide members with an improved understanding of the capabilities of AI including a survey of the current AI tools, its limitations and associated challenges, and recommendations on how to harness this family of technology.

Limited but Executive Summary of the Report is open to non-members.
