## [No.89] TF2021: New report on Members' Vision Launched

Our new report titled "IERE Technology Foresight Activities 2021: Survey on IERE members' Vision" was posted on our website last week.

In the report, technologies that are being implemented and their priorities in three business sectors--; a. power generation; b. transmission, distribution, and retail; and c. strategic management--; were investigated concerning major trends (megatrends) surrounding the power industry. Furthermore, the impact of COVID-19 was evaluated.

The executive summary is open to non-members and the full report is available to members only. Appendices will be provided on a priority basis to members who responded to the questionnaire conducted during the TF2021 activities. They will be released to other members later.
