

# IERE Pick-up Papers - Energy storage and Battery -

1 MW 4 MWh Turner Energy Storage Project in Pullman from Wikimedia Commons.

IERE Central Office

March 2020

Picked up presentations related to “Energy storage and Battery” from IERE GM/Forums and Workshops from the last 3-4 years.

# Contents

1.	<b>Energy Storage Technologies &amp; Applications in Power Systems - Challenges and Experiences (May 2017, Canada, S1-1)</b>	1
	Yao Liangzhong, Vice President, CEPRI, China	
2.	<b>Battery Storage Advantages for Fast Charging Stations (May 2017, Canada, S1-2)</b>	19
	Matthieu Loos, Engineer, Power Systems, Powertech Labs Inc., Canada	
3.	<b>Application of Cost-Effective Grid-Scale Battery Storage as an Enabler of Network Integration of Renewable Energy (May 2017, Canada, S1-5)</b>	28
	Innocent Davidson, Professor, Department of Electrical Power Engineering, Durban University of Technology, South Africa	
4.	<b>Study of Using Energy Storage to Mitigate the Impact of High Renewable Energy Penetration to the Grid (May 2017, Canada, S1-6)</b>	37
	Che-I Lin, Electrical Engineer, Taiwan Power Research Institute, Taiwan	
5.	<b>A Flow Battery for Long Duration Applications (May 2017, Canada, S2-2)</b>	51
	John McLeod, Vice President Engineering, ZincNyx Energy Solutions Inc., Canada	
6.	<b>R &amp; D strategy and its related activities on advanced Li-ion batteries for electrical energy storage system (May 2017, Canada, S2-4)</b>	66
	Sang-Min Lee, Principal Researcher, Battery Research Center, KERI, Korea	
7.	<b>Recent status of the battery energy storage technologies in Japan and issues related with performance evaluation (May 2017, Canada, S2-5)</b>	77
	Yuichi MITA, Senior research Scientist, CRIEPI, Japan	
8.	<b>Research and Application of Fiber Bragg Grating Temperature Sensor for Energy Storage Battery In-situ Detection (May 2017, Canada, S2-6)</b>	92
	Xu Chong, Engineer, Electrical Engineering and New Material Department, CEPRI, China	
9.	<b>Utility Scale Energy Storage Application and Development in Korea (May 2017, Canada, S3-3)</b>	102
	SungMin Cho, Senior Researcher, Energy New Business Lab., KEPRI, Korea	
10.	<b>Operation of ESS Interconnected to the Distribution Feeder by Distribution Management System (May 2017, Canada, S3-6)</b>	114
	Wonwook Jung, Senior Researcher, KEPCO, Korea	

- 11. A Realistic Method of Forecasting Dam Water Inflow for an Efficient Operation of Hydroelectric Power Stations including Pumped Storage (May 2017, Canada, S4-2)** 125

Koichiro HATA, Senior Researcher, Electric Power Research & Development Center, Chubu EPCO, Japan
- 12. Field operation of multiple BESSs for demand management of a large-scale electricity consumer (May 2017, Canada, S4-4)** 138

Seul-Ki Kim, Principal Researcher, Executive Director of Advanced Power Grid Research, KERI, Korea
- 13. Recent trends on interconnection of power storage facilities to real systems in Japan and the United States (May 2017, Canada, S4-5)** 153

Joji Kawano, Deputy Senior Research Associate, JEPIC, Japan
- 14. Recent examples of effort by low carbonized countries to expand the introduction amount of renewable energy (November 2017, Malaysia, S2-6)** 169

Joji Kawano, Deputy Senior Research Associate, JEPIC, Japan
- 15. Applications of secondary battery technologies for realizing a low-carbon society (November 2017, Malaysia, S4-6)** 181

Tomohiko IKEYA, Associate Vice President, Materials Science Laboratory, CRIEPI, Japan
- 16. Research of SOC Estimation Algorithm for LiFePO<sub>4</sub> Battery based on Differential Curves (November 2017, Malaysia, S4-7)** 196

XU Shouping, Senior Engineer, Energy Storage and Electrotechnics Department, China EPRI, China
- 17. Advanced Challenge of Kyushu EPCO due to Rapid PV Penetration (May 2018, Japan, S2-5)** 207

Tsuyoshi Harimoto, Deputy Senior Research Engineer, Advanced Power System Engineering Group, Research Institute, Technical Solution Headquarters, Kyushu Electric Power Co., Inc., Japan
- 18. RWE's former, current and possible future energy storage applications (September 2018, Germany, S3-1)** 222

Jan Josef Bernholz, Project Engineer, TOE Engineering, RWE Technology International GmbH, Germany
- 19. Battery Energy Storage Solution - Enhancing the operational flexibility of flexible combined cycle industrial gas turbines (September 2018, Germany, S3-2)** 232

Uwe Fuchs, Energy Management Division, Medium Voltage & Systems, Projects & Applications, Siemens AG, Germany

- |     |  |     |
|-----|--|-----|
| 20. | <b>Recent trends on installation batteries in real systems of each country to realize low carbon society (September 2018, Germany, S3-3)</b>                         | 242 |
|     | Joji Kawano, Senior Research Associate, Research Department, Japan Electric Power Information Center, Japan  |     |
| 21. | <b>Battery Energy Storage System for Grid peak shaving (March 2019, Indonesia, S2-4)</b>   | 255 |
|     | Wilhelm van Butselaar, Wartsila Singapore Pty Ltd, Singapore   |     |
| 22. | <b>Pumped Storage Hydro Plant: Battery of the Grid (March 2019, Indonesia, S2-5)</b>   | 268 |
|     | Mohamad Hakim Bin Zainuddin, Manager, Single Buyer Department, Tenaga Nasional Berhad, Malaysia  |     |
| 23. | <b>Secondary battery energy storage system enabling use of renewable energy to realize a zero CO<sub>2</sub> emission society (October 2019, South Africa, S3-1)</b> | 277 |
|     | Tomohiko Ikeya, Associate Vice President, Materials Science Research Laboratory, CRIEPI, Japan   |     |
